cloud telephony that means business

For small businesses right through to multi-site corporations, Coast to Coast Cloud is the perfect solution. Coast to Coast Cloud is affordable, flexible and professional!

Coast to Coast Cloud operates across your existing internet connection. If you don't already have this in place, we can supply you with our Assured Broadband service which will guarantee your call quality.

No line rental and greatly reduced call costs will ensure an immediate saving over your current system.

Users can be added according to your needs, and you can grow into the system one user at a time with no limit on expansion.

Better still, Coast to Coast Cloud is fully supported by us, and with this you gain the peace of mind that we'll be on hand in the event of a problem, or just when you need a little advice.

what are the benefits?

No line rental

With the savings made on your line rental and call costs we can deliver the new solution without affecting your bottom line.

No monthly licence cost

Voice optimised broadband

We can provide a connection guaranteed to support your phone calls.

Your existing telephone number

Your number will be transferred onto the new telephone system so there will be no need for a change, (even if you move out of the area). This makes it easy for your customers to stay in touch.

Any UK area code

Users can have a telephone number from any location in the UK.

You can never outgrow it

Extra users can be added at any time with no limit.

It is fully scalable

The system can cater for businesses of any size, irrespective of whether you trade from a single site or many offices.

Improved call management

We can automatically redirect your calls to any chosen number should your phones go offline.

Moving premises?

Simply take the phones with you. No expensive set up costs and no physical telephone systems

Future-proof system

You will not have to replace the system in a few years to get the latest features; you will automatically receive the latest upgrades.

Built-in fraud protection

Disaster recovery

Our system is hosted on servers in seven different locations, so in the event that one of our servers fail, one of the others immediately takes over.

Full local support

We will be on hand in the event of a problem, or just when you need a little advice.

payment options

You can either purchase the system up-front to include all of your licences for three years, or we can provide you with a three year rental agreement.

At the end of the three year term you own all of the equipment and can continue to rent the service from us for a small fee.

SUPERVISOR AND AGENTS

Our Communicator's Supervisor Edition is a real-time hub for monitoring and managing calls and agents. It displays real time call and agent status and allows the supervisor to 'enable' and monitor agents. It includes functionality to monitor and manage calls and performance, plus allows supervisors to receive escalated calls.

REAL TIME AGENT MONITORING

Real Time Monitoring means managers can oversee and track Agent calls as they are carried out, so they can act on real time information during every call. Analytics are used to track Agent attainment, oversee calls between customers and Agents, and deliver fast, efficient performance feedback.

CONTACT CENTRE WALLBOARD

Our wallboards provide simple, targeted information for all of your Agents in seconds. They help keep Agents up to date with situations as they develop, while allowing them to remain focussed on the job in hand.

Our mobile application is specifically designed to take your communications to a whole new level. Its main purpose is to enhance and simplify your day-to-day communications experience.

Which phones are right for you?
