a heavyweight punch!

LITE is a slimmed down version of the Business solution, which has been built with small businesses in mind. It includes a Mobile app for both iOS and Android, so users can always be reached and 1,000 minutes of free calls per user per month.

While it retains the core functionality of the main Business product, features that are unnecessary in a smaller business environment have been taken out. Importantly, however, the quality of service remains the same, as it still uses exactly the same technology as the business version, making the system more cost effective.

Unlike other 'seat only' solutions, LITE is not a build-it-yourself solution - we have done all the hard work for you so that LITE is a perfect fit for your business. It includes all the essentials, a handset, an attractive call bundle and those business critical features which you can see overleaf, such as conference calling and voicemail.

keyfeatures

Our Lite product comes with a streamlined set of call handling and management features, supported by the same top level technology, and all operated through an easy-to-use interface.

MOBILE PAIRING

Sync your mobile with your office handset. Never miss a call

EXTENSION

Reach people in 3 or 4 digits, wherever you are

UNIFIED VOICEMAIL

Pick up all your voicemail from any device, anywhere

CONFERENCE CALLING

Set up a private virtual conference room with external dial ins

CALL QUEUEING

Never lose a customer when you've got them on hold

CALL GROUPS

Directs call super effectively and never miss a call

AUTO ATTENDANT

Handle calls professionally and efficiently

MOBILE APPS

Manage the whole phone system from your smart phone

SPEAKERPHONE PAGING

Call out to all extensions

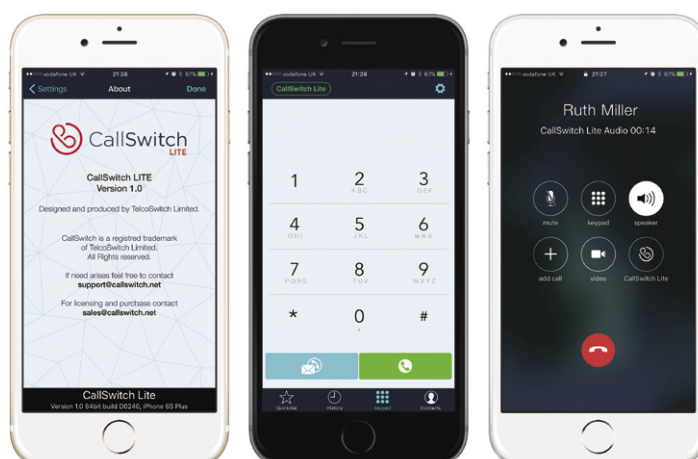

CALL MANAGEMENT

Top-of-the-range features that make call-handling a breeze

the lite app

Our LITE mobile application is specifically designed to take your business communications to a whole new level. Its main purpose is to enhance and simplify your day-to-day communications experience. It allows users to utilise their smartphones as an extension, including video calling, call recorder, detailed call history and call forwarding & waiting. It is available on all iOS and Android smart phone devices.

useful features
